Cidney Victoria

BSIT Student | Aspiring Web Developer
Laguna, Philippines | cidneyvictoria@gmail.com | 09107986670
GitHub: github.com/cidneyvictoria | Portfolio: cidneyvictoria.github.io

SUMMARY

Third-year BSIT student at the Polytechnic University of the Philippines (Calauan, Laguna) aspiring to work as a web developer. Hands-on experience building REST APIs with Spring Boot and ASP.NET Core, database-backed web applications, and responsive front-end pages using Java, C#, PHP, HTML, CSS and JavaScript. Coursework in database administration, networking and human-computer interaction. Works well in group projects and documents work clearly, with projects published on GitHub and a personal portfolio website.

EDUCATION

Bachelor of Science in Information Technology|Polytechnic University of the Philippines - Calauan, Laguna Campus 2024 - Present
Expected graduation: 2028
Relevant coursework: Object-Oriented Programming, Integrative Programming, Database Administration, Web Development, Networking, Human-Computer Interaction

TECHNICAL SKILLS

Languages: Java, C#, PHP, JavaScript, SQL, HTML5, CSS3
Frameworks: Spring Boot, ASP.NET Core, Laravel
Databases: PostgreSQL
Tools: Git, GitHub, Docker, WSL2, VS Code, IntelliJ IDEA
Concepts: REST API development, database design and administration (indexes, views, functions, triggers), responsive web design

PROFESSIONAL SKILLS

Teamwork and collaboration, problem solving, technical documentation, communication

PROJECTS

Pokédex REST API (Spring Boot) | Java, Spring Boot, Spring Data JPA, H2, HTML, JavaScript
GitHub: github.com/cidneyvictoria/pokedex-spring-boot

- Developed a REST API with Java and Spring Boot 3 that stores and serves Pokémon data, with create, read, update and delete operations
- Organized the application into controller, service, repository and model layers, using Spring Data JPA for database access
- Stored data in an H2 database and seeded it with initial Pokémon records on startup through a data initializer
- Added a global exception handler so the API returns consistent error responses
- Built an HTML/JavaScript frontend, served by the Spring Boot app, that shows Pokémon as cards and lets users edit and delete entries through the API
- Documented setup and usage in a README and managed the project with Git and GitHub

MedTrack Landing Page | HTML5, CSS3
GitHub: github.com/cidneyvictoria/medtrack-landing-page

- Created a responsive static landing page for a wellness reminder app capstone concept
